

PureZyme

PureZyme breaks down protein invaders in the blood supply, leaving them vulnerable to destruction by the immune system.

AN ALL-NATURAL BLOOD ENHANCER!

SUPPLEMENT FACTS		
Serving Size 2 Capsules		
Amount Per Serving		% Daily Value
Calcium (as calcium citrate)	18.2 mg	*
Protease	370,000 HUT	*
*Daily Value not established		

Other ingredients: Vegetarian Capsule (cellulose & water)
Enzyme activity is measured in Food Chemical Codex (FCC) units.
Store tightly in a cool, dry place. Keep out of reach of children

120 capsules per bottle. No fillers.

Recommended Usage: Take at least 2 capsules first thing in the morning and also right before bed. The recommended usage provides you with 740,000 units of activity.

This formulation will optimize the amount of protease that is absorbed into the bloodstream, allowing it to break down the protein invaders that are not a part of the natural body. The results of PUREZYME can be seen in the blood within ten minutes after its ingestion. This happens regardless of whether or not there was any food in the stomach.

For those with poor protein digestion, PUREZYME may also be taken with DIGESTZYME at meals where animal protein is eaten. Although DIGESTZYME itself contains a large amount of protease, if protein digestive problems are present and if red meat remains in the diet, then taking 1 PUREZYME capsule with 2 DIGESTZYME capsules may be a safeguard so that protein will do no further harm to the body.

Note that PUREZYME also helps a variety of other symptoms and conditions. For example, it is good for chronic constipation. PUREZYME is also excellent when taken with EXCELLZYME and/or CALMZYME to enhance the nervous system or immune system. Individuals with PMS or menopausal symptoms should increase their protease during menses. A convenient way to do this is to take 3 capsules of PUREZYME with 3 capsules of MASTERZYME or ULTRAZYME three times per day.

Indications:

- Hypoglycemia
- Hepatitis
- Fungal infestation
- Parasites
- Liver
- Diuretic
- Anxiety syndromes
- Virus
- Inflammatory conditions of the ear, nose, throat, mouth, sinus, and/or gums.
- Skin eruptions
- Osteoporosis
- Acute inflammation
- Kidney
- Abscess
- Infections
- Bacteria

Component Benefits:

Protease indirectly supports the immune system. This happens because protease is able to dissolve almost all proteins if they are not components of living cells. Normal living cells are protected against lysis by the inhibitor mechanism. However, remember that parasites, fungal forms, and bacteria are themselves all proteins. Even viruses are cell parasites consisting of nucleic acids covered by a protein film. Enzymes break down undigested protein, cellular debris, and toxins in the blood, thus sparing the immune system this task. The immune system can then concentrate its full action on the bacterial and/or parasitic invasion.

The PUREZYME formulation is based on the needs of the individual's biochemical body type instead of the individual's size or weight. Children, for example, may safely take PUREZYME. If necessary, the capsule can even be removed, and then the powder mixed with liquid for easier ingestion.

Protease is a polymorphic enzyme. The enzyme action it produces can adapt to meet the current digestive or metabolic needs of the body.

Contraindications:

If at anytime you feel burning sensations, take 3 capsules of GASTROZYME. The burning will dissipate shortly. For support, continue to take GASTROZYME with PureZyme or DigestZyme with meals and when needed.
